Dear IACNA Suppliers:

IACNA has selected Ryder Integrated Logistics to design, implement, and manage external material flow into its US and Canada locations.

A representative from Ryder Integrated Logistics will be contacting you for detailed information regarding the following:

- Contact information (Shipping, Receiving, etc.)
- Facility information (Dock constraints, Window times, etc.)
- Part/Packaging information (Container sizes, standard packs, etc.)

It is an IACNA requirement that Ryder secures all necessary supplier data in order to provide IACNA with the best transportation solutions. To achieve this, Ryder utilizes its Logistics Management Suite (LMS). Within LMS lies the Data Management System (DMS) module designed to help suppliers manage their own data for IACNA. **It will eliminate the hassle of packaging surveys.**

This system will not replace how you receive your EDI requirements. Along with many other advantages, DMS is a more efficient solution to meeting and complying with the requirements of Lear/IAC.

Please cooperate with these inquiries, and respond as quickly as possible. All information received will remain confidential.

If you have any questions about this project please contact Jeremy Hardman at 313-240-3413 or jhardman@lear.com.

Thank you in advance for your cooperation and we look forward to your commitment and contribution to this program. The success of this initiative depends on your full support.

Sincerely,

Craig Russell
IACNA, Inc.
